Personal statement

I am an excellent team worker and am able to take instructions from all levels and build up good working relationships with all colleagues. I am flexible, reliable and possess excellent time keeping skills. I am an enthusiastic, self-motivated, reliable, responsible and hard-working person. I have a passion for software development work. I am currently seeking an opportunity to join a company that can help me enhance my software development skills, deepen my knowledge, and realize my potential.

I like to develop programs using C#. I can start immediately if develop desktop application using C#, and I need short-term training if develop Web application. I am open to exploring various opportunities that allow me to apply the knowledge I have gained in software development. Through my long-term work in software development, I have formed my own development experience in some areas of software development and mastered a set of laws of software development work. I really like to use C#, because this language is a compiled language, which can avoid many runtime errors, and C# is similar to Java or C++, the code structure is very scientific and reasonable. Based on the skills I currently have, I think I can use C# to develop all software programs. Of course, in other areas, such as AI, it is more reasonable to use Python. Because AI technology has already accumulated an irreversible amount of program code using Python. I have already learned Python, and except for the fact that the IDE is not very friendly, there is no problem with other aspects. However, I do not oppose the use of other programming languages. At the OOP level, high-level languages are the same. Solving software functional problems is the primary task, so using other programming languages is no problem for me, and I can master them in a short time.

I expect that I will not only be an employee, but also that I can become a partner of the company in the future through my efforts and contribute my greatest strength to the development of the company. I can start working immediately.
